FOR IMMEDIATE RELEASE  
August 4, 2015

## **BE ALERT**

### **Scammers may exploit Microsoft's Windows 10 update to target you**

*Microsoft is in the process of releasing its new Windows 10 operating system. This upgrade is free and promises to fix problems for users.*

*Because more than a billion computer users on planet Earth use Microsoft operating systems, there may be questions.*

*We at First National Bank encourage you to be careful. Cyber criminals will undoubtedly try to exploit this situation. You might get calls from scammers claiming to offer tech support – for a charge to your credit card.*

*We encourage you **do not click on any links** from “phishing” emails promising to help you. And, **do not share your credit card information with** persons who make such claims. Microsoft offers the upgrade for **free**. You can learn about it safely at Microsoft's website.*

*Here is a safe link from Microsoft that can explain about the Windows 10 upgrade:*

<http://www.microsoft.com/en-us/windows/windows-10-upgrade>

Be smart and protect your identity!

*From your friends at First National Bank,*

*Chuck Daye, Senior Vice President, CIO/CISO  
First National Bank & Trust Co.*
